Karen:

Thanks for the update.

Since I have been involved with this site since about the beginning of August 2014, I am very interested in seeing the actions continue at an accelerated pace. I have shared a lot with you guys on the EPA perspective of things that need to be done.

I hope that both TCEQ and the PRP Group continue the close coordination with Air Alliance Houston, Texas Organizing Project, and Texas Low Income Housing Information Service as well as (b) (6)

(b) (6) and City Officials. If you need assistance, please let me know as I want this project to be successful for the sake of everyone.

Thanks

Subject: RE: Transition and Schedule

Gary,

We received notice today that the site has been officially approved into the VCP. We spoke with PBW and are in the process of obtaining quotes to completely fence the property and to start routine inspections of the facility. Our immediate focus is on securing the site and ensuring that the storm water is properly managed. PBW is also planning on visiting the local library and local police substation to introduce themselves and provide contact information should any immediate issues arise during the site transition.

It is our hope that a regular presence can be established by early next week and that in the interim EPA and/or its contractors do make any obvious changes or announcements at the site until we can properly secure the facility. It is our concern that once word gets out about a switch in management at the site that the trouble makers will take advantage and we want the site to be secured before that happens.

Please let me know if you have any questions and thanks for your help

Karen:

I need to get an understanding you the PRP Groups plan going forward as we will be demobing from the stie as early as COB Wednesday, June 10. As you know, we need some continual presence from the PRP Group. I do not want a laspe in activities which would create a potential for speculation as to the next steps or that would allow vandalism to occur on-site which could result in issues.

Thanks

Gary Moore
